

Solarflow

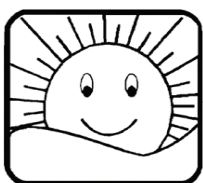

75MM
Pump Diameter

“Helical Rotor” solar powered submersible water pump

1. *Permanent magnet brushless dc motor technology and helical rotor pumps improves efficiency by 25% above Ac pump systems.*
2. *The pump controller monitors and controls the pump operation.*
3. *Protected against reverse polarity, overload and high temperature.*
4. *Speed controlled, adjustable to reduce the flow rate to 30%.*
5. *Integrated MMPT tracking for improved performance.*
6. *Battery operation, low voltage disconnect and reconnect after recovery.*
7. *Max. efficiency 85% motor & controller.*
8. *No electronics in the motor easily accessible above ground.*
9. *Water filled motor. Good for the environment.*
10. *IP 68 max pump submersion unlimited.*
11. *Dry run protection.*
12. *All 316 stainless steel.*
13. *2 year manufacturers warranty against defects and workmanship.*
